3/4" Open end wrench, Silicone

PROCEDURE

STEP 1 Pull the choke knob all the way out.

STEP 2 Place the choke knob cover over the stock choke knob and put a small amount of silicone on the threads. Place the slotted lockplate over the choke cable and screw it into the cover as far as it will go. The flats cut on the back of the lockplate permit the use of a 3/4" wrench. Be careful, don't over tighten and break the plastic knob.

STEP 3 Check to be sure the choke control can be pushed in all the way to the full 'off' position.
